

Q43. Imagine researchers following up on Seeley's study brought some flat periwinkles from Appledore Island into the lab to test for heritability. What results could they observe that would support the hypothesis that shell thickness is heritable in these snails? Consider results they could directly observe without using molecular techniques.

Drag words or phrases into the yellow area to complete the sentence.

If some snails have thick-shelled offspring and some snails grow thicker shells then this is good evidence that shell thickness is heritable.

MODIFIERS

always
usually
never

and
but
or
both

CRITTERS

all snails
some snails
thin-shelled snails
thick-shelled snails
the snail population
in the presence of crabs
in the absence of crabs

RESULT

increase(s) in average shell thickness
grow thicker shells
have thin-shelled offspring
have thick-shelled offspring
have offspring of random shell thickness
