### **The Design of Food Extrusion Dies: Forte, Dennis, Young ...**

Although the history of food extrusion processing goes back to the late 1800s, the control of this process and the design of new extruded products are still mostly based on limited empirical knowledge. Considering conventional products, an empirical approach can provide a solution, but it probably will not be a cost-effective one.

### **Design of Food Extrusion Dies, Europe (Norway) — FIE**

Extrusion is used in food processing, forcing soft mixed ingredients through an opening in a perforated plate or die designed to produce the required shape. The extruded food is then cut to a specific size by blades. The machine which forces the mix through the die is an extruder, and the mix is known as the extrudate. The extruder is typically a large, rotating screw tightly fitting within a stationary barrel, at the end of which is the die. Extrusion enables mass production of ...
